How to Measure

- Your dress size measurements should be taken while wearing undergarments similar to the ones you will wear with your dress.
- For floor length measurements, it's important that you wear shoes with a similar heel height to those you will be wearing with your dress.
- Stand comfortably with equal weight on both feet, arms resting easily at your sides, and relaxing your stomach muscles.
- The measuring tape shouldn't be pulled too tight or have too much slack, and should always be parallel to the floor.

Watters Modern Size Guide - Bridesmaids S19 & Beyond
